HIGH-PERFORMANCE SCHOOL SYMPOSIUM**

MAY 24TH, 2023

La Cantina Italiana
911 Waverly St, Framingham, MA 01702

**BUILD WITH
STRENGTH**

Click Here to Register

EVENT DESCRIPTION

Designing for educational buildings is evolving. Architects and school administration must consider various factors, such as comfort and wellness, thermal performance and sustainability in new school design. This symposium will focus on new and emerging energy efficiency and whole-lifecycle carbon reduction best practices. The participants will demonstrate how new methodologies of client engagement, materials, change management, analysis, and modeling of ecosystem services can lead to the creation of new pathways which create a healthier more productive learning environment for our students.

CONTINUING EDUCATION

Earn 5 AIA-CES Learning Units and
5 Professional Development Hours (PDH).
